Message

Test Execution Summary

Total Tests	Passed Tests	Failed Tests	Execution Time	Environment
12	7	5	18m 22s	QA

Execution Stability Overview: The test execution has a moderate level of stability concerns, with 5 out of 12 tests failing. The reliability risks are moderate, with some tests experiencing timeout exceptions and assertion errors.

Failure Classification

Failure Type	Count	Test Names
UI Issue	2	test_login_with_valid_user, test_search_product
Assertion/Data Issue	1	test_checkout_payment
API Issue	1	test_user_profile_update
Flaky Test	1	test_add_to_cart

Root Cause Analysis

test_login_with_valid_user

Failure Type: UI Synchronization Issue

Root Cause: Element not clickable within timeout period

Evidence from Logs: Expected condition failed: waiting for element to be clickable

Recommendation: Add explicit wait strategy

Priority: **HIGH**

Message Report

D:\Abhinav\Gen%20AI%20Course%20related\Assignment%20Documents\Phase%202\Langflow%20POC\Analyzer%20Results.html

test_checkout_payment

Failure Type: Assertion Failure

Root Cause: Expected payment success message not displayed

Evidence from Logs: AssertionError: Expected: Payment Successful, Actual: Payment Failed

Recommendation: Validate payment response handling

Priority: **MEDIUM**

test_search_product

Failure Type: Locator Failure

Root Cause: Search textbox locator not found

Evidence from Logs: NoSuchElementException: Unable to locate element: //*[@id='search-input']

Recommendation: Update locator strategy

Priority: **HIGH**

test_user_profile_update

Failure Type: API Issue

Root Cause: 500 Internal Server Error from profile API

Evidence from Logs: HTTP 500 Internal Server Error: /api/profile/update

Recommendation: Investigate API issue and update test

Priority: **HIGH**

Message Report

D:\Abhinav\Gen%20AI%20Course%20related\Assignment%20Documents\Phase%202\Langflow%20POC\Analyzer%20Results.html

Evidence from Logs: HTTP 500 Internal Server Error: API Endpoint: /api/profile/update

Recommendation: Investigate API issue and update test

Priority: **HIGH**

test_add_to_cart

Failure Type: Flaky Test

Root Cause: Test passed on retry attempt

Evidence from Logs: Test failed in first attempt, Test passed in retry

Recommendation: Investigate flaky test behavior and update test

Priority: **LOW**

Flaky Test Detection

- test_add_to_cart: Test passed on retry attempt, indicating flaky behavior
- Retry success/failure behavior: Test failed in first attempt, Test passed in retry
- Intermittent behavior indicators: None
- Stability concerns: Moderate

Recommendations

- Improve synchronization handling for UI tests
- Enhance assertion validation for payment tests
- Update locator strategy for search tests
- Investigate API issue and update test for profile tests
- Investigate flaky test behavior and update test for cart tests

QA Insights

- Critical risk areas: UI synchronization, payment validation, API issues
- Most unstable modules: Authentication, Checkout, Search
- Failure trends: UI issues, assertion failures, API issues
- Quality concerns: Moderate, with some tests experiencing stability issues
- Execution health assessment: Moderate, with some tests requiring updates and improvements
